Sultan of Space shares image of 'green' Abu Dhabi from ISS

Al Neyadi describes capital of country as 'heart of beloved home, UAE'

DUBAI

BY SAJILA SASEENDRAN
Senior Reporter

Continuing to share his profound experience from the International Space Station (ISS), UAE astronaut Sultan Al Neyadi yesterday shared an image of a 'green' Abu Dhabi from space.

The aerial image from over 400km above Earth showed the capital in lush green.

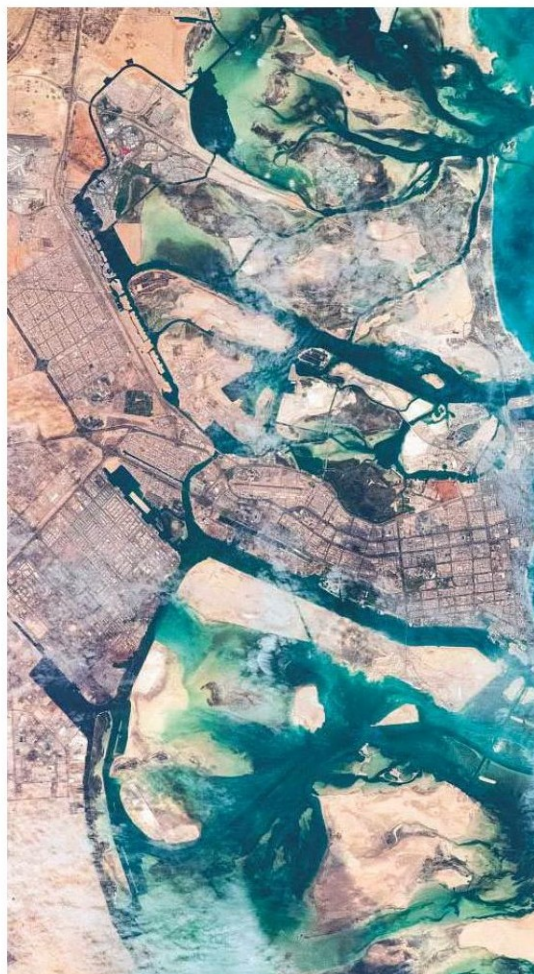

"Here is the heart of our beloved home, the UAE. A city with a vibrant present and promising future...The capital of our nation #AbuDhabi," Al Neyadi posted on social media.

Armed with his camera, the Emirati astronaut, who is on the longest Arab space mission on-board the ISS, has been capturing awe-inspiring photographs of various spots on Earth.

Last week, he shared an incredible image of Morocco.

"You cannot pass through Morocco without being in awe of its beauty. Home to the first and oldest university, al-Qarawiyin as well as stunning landscapes, architecture and history, here I have captured the beautiful capital city of Rabat with its Bou Regreg river," he said in the post.

Among other images previously shared by Al Neyadi are day and night views of the UAE, aerial view of his home town, Al Ain, and a picture of Dubai's night view.
